

## **Faculty of Allied Health Science**

### **Department of Audiology and Speech Language Pathology**

---

The placement cell bridges the gap between academic training and professional employment. It facilitates career guidance, organises campus recruitment, and support students in securing roles across hospitals, clinics, NGO's, rehabilitation centres and schools. This is crucial for translating academic competencies into real world impact.

In the Department of Audiology and Speech Language pathology, we have a placement cell which looks after the recruitments by conducting placement drives and campus placements across various clinical and rehabilitation setups. The passed-out students from the Department have been placed in reputed hospitals like Max Hospitals across Delhi NCR and in various National and Multinational companies like Priority Hearing Care Pvt Ltd., and Amplifon India Pvt. Ltd.
